Article

BACKGROUND

On March 23rd, 2020, President Donald J. Trump, during his daily briefings on the response to Covid-19, suggested the use of disinfectants to treat patients infected with the novel coronavirus Covid-19. We conducted a study on the efficacy of using commercial disinfectants through oral administration or subdermal injection.

METHOD

We read the labels on the bottles we found in the janitors closet.

CONCLUSION

This will kill you. Don't do it.
